

DIMM DDR2 DRAM MEMORY 2 TO 4GB

FEATURES

- Up to 667MHZ and 800MHZ
- Lifetime warranty
- No ECC
- No registered
- 240 Pin
- Operating Temperature: 0° C to 85° C
- Storage Temperature: -55° C to +100° C

Illustrative image

DIMM DDR2 memory modules are commonly applied in PCs, in which fast data transfer, high capacity as well as low power consumption is required. In order to ensure the highest quality of K-MEMORY memory modules, only the selected components are used. Thanks to the multilevel quality control as well as meticulous tests of each produced module, the user receives the products of exceptional reliability and the highest quality.

Compared to the older solutions, DDR2 modules are distinguished by its supply voltage of 1.8V, that makes it possible to reduce the running costs and energy by up to 40%. K-MEMORY DDR3 memory modules have been designed for the most demanding users who expect the highest performance and stability. New generation of memory includes both single and dual channel modules with frequency up to 800 MHz.

Part Number	Capacity	Organization	Type	Clock	PC3	CL	Voltage
K667/2GB	2GB	256X8	DIMM DDR2	667MHZ	PC2-5300	5	1.8V
K800/2GB	2GB	256X8	DIMM DDR2	800MHZ	PC2-6400	5	1.8V
K800/4GB	4GB	256X8	DIMM DDR2	800MHZ	PC2-6400	5	1.8V

Warranty: 36 months

With immediate exchange offered directly by local supplier worldwide
